Dear Doris:

I have just copied six tapes for you and sent them along. They are all speed 7.5 on full track tapes--full track in case you want to cut things out you won't cut through another track.

Tapes 1, 2, 3, 4 were recorded that famous night when Gabriela read from six to twelve (in one of the pauses I make a dash to the kitchen for a banana and have my mouth full at one point--my supper that evening). These I have copied in order. You will find that the end of one sometimes is repeated at the beginning of another.

If I remember correctly I typed ^{out} all these from the tape.

There are still some more tapes of the Poema de Chile and comments of Gabriela. They will be along soon.

I checked your ailment in my THE MODERN HOME PHYSICIAN. Many people apparently have this but not in a severe form. This is one thing that I am quite sure I have not because I have often noticed the difference between myself and most people--most people are immediately revived with food. I have some friends who are in the state of collapse in they are late for a meal. "Deeper levels of hypoglycemia are manifested by great weakness, perspiration, various emotional changes, cloudy thinking, and perhaps convulsions. . . . Certain tumors of the pancreas which produce insulin can cause hypoglycemic states. Such tumors are relatively rare..."

I shall send you a card when I know when I shall be in N.Y.C.

Much love
M. B.
