

## Boris Pavalov's Lecture About the evolution of cultural intelligence

This article was written by Boris Pavalov, who was invited to speak at the 2006 conference "Cultures in Contact" organized by the Institute of World Culture. He has been working here as a visiting professor since 2004. His research interests include the history of the Russian language, the history of literature, and the history of culture in Russia and abroad. He has also conducted research on the history of the Russian language in the United States and Canada, and on the history of the Russian language in Germany.

Professor Pavalov has also spent many years writing articles on various topics in the field of Russian literature. These include "Russian literature in Europe," "The role of the Russian language in European literature," and "The development of the Russian language in Europe."

In his lecture Professor Pavalov will discuss the history of the Russian language in Europe, and the development of the Russian language in Europe.

10.00-11.30, Auditorium, 2nd floor, 2006-07-12

Boris Pavalov: "The history of the Russian language in Europe"

### Notes

The conditions and forms of types of native speech peculiar to different groups in the society and the social classes, which have been developed through historical processes, are called dialects. The term "dialect" is used to denote the language varieties of the same language community, which are characterized by the same linguistic features, although they may differ from each other in some of their linguistic features.
