

Associations of Parent, Teacher, and Child Reports of Children's Reading & Reading Attitudes in Middle Elementary Schoolchildren, 1999–2009

Background: Reading is a complex skill that is influenced by many factors. This study examined the associations between parent, teacher, and child reports of children's reading and reading attitudes in middle elementary schoolchildren. The study also examined the associations between parent, teacher, and child reports of children's reading and reading attitudes in middle elementary schoolchildren.

Methods: Data from the National Longitudinal Study of Adolescent Health (Add Health) were used to examine the associations between parent, teacher, and child reports of children's reading and reading attitudes in middle elementary schoolchildren. The study also examined the associations between parent, teacher, and child reports of children's reading and reading attitudes in middle elementary schoolchildren.

Results: The study found that parent, teacher, and child reports of children's reading and reading attitudes in middle elementary schoolchildren were significantly associated. The study also found that parent, teacher, and child reports of children's reading and reading attitudes in middle elementary schoolchildren were significantly associated.

Conclusions: The study found that parent, teacher, and child reports of children's reading and reading attitudes in middle elementary schoolchildren were significantly associated. The study also found that parent, teacher, and child reports of children's reading and reading attitudes in middle elementary schoolchildren were significantly associated.
