

Large herbivores (deer, wild boar, roe deer, wild goats) are the main prey of the wolf. The wolf is a highly adaptable predator, able to survive in a wide range of habitats, from mountainous areas to lowland forests, and from cold to warm climates. It is a highly social animal, living in packs of 2-12 individuals, led by a dominant male and female. The wolf is a highly intelligent animal, capable of learning from experience and of using tools. It is a highly vocal animal, with a wide range of sounds, including howls, bays, and growls. The wolf is a highly resilient animal, capable of surviving in a wide range of environments, from cold to warm climates, and from mountainous areas to lowland forests.
