

Development of a Self-Concept Inventory

Walter D. Kunda
University of Illinois at Chicago

The Self-Concept Inventory (SCI) is a 100-item self-report measure of self-concept. It is based on the theory that self-concept is a hierarchical structure of self-identifications. The SCI is designed to measure the degree to which individuals identify themselves with various self-identifications.

The SCI is a 100-item self-report measure of self-concept. It is based on the theory that self-concept is a hierarchical structure of self-identifications. The SCI is designed to measure the degree to which individuals identify themselves with various self-identifications.
