Local Conditions

Much has been written in the past few months about the local conditions in the United States. It is not the purpose of this article to discuss the general situation, but to point out some of the local conditions which are of importance to the physician.

There are many local conditions which are of importance to the physician. These conditions are of two kinds: (1) those which are of importance to the physician as a whole, and (2) those which are of importance to the physician in a particular locality.

The first kind of local conditions are those which are of importance to the physician as a whole. These conditions are of two kinds: (1) those which are of importance to the physician as a whole, and (2) those which are of importance to the physician in a particular locality.

The second kind of local conditions are those which are of importance to the physician in a particular locality. These conditions are of two kinds: (1) those which are of importance to the physician in a particular locality, and (2) those which are of importance to the physician in a particular locality.

There are many local conditions which are of importance to the physician. These conditions are of two kinds: (1) those which are of importance to the physician as a whole, and (2) those which are of importance to the physician in a particular locality.
