There are many ways to approach this problem. One way is to consider the following: if we have a sequence of numbers a_1, a_2, \dots, a_n , then the sum of the first k terms is given by $S_k = a_1 + a_2 + \dots + a_k$. We can then use this formula to find the sum of the first n terms of the sequence.

Now she was writing you a letter
and with tears did flow, and
she said, "Oh, how good you
are, and how good we ought to be,
but I am afraid I have done
more than I should."

and those countries, as the different
and later as their conditions will
allow, also to take measures to
help them to implement such
as are proposed by members of the
international. The other powers
of the world are also engaged in
an urgent effort to assist in
overcoming both of these crises. The
United States has already
done much to help those
less fortunate than ourselves, and
will continue to do so.

When we have the time, I would like to present some of our findings concerning the use of the Internet as a teaching tool.

Consequently, the results of our study
are encouraging, although we believe
the effects of the intervention may have
been overestimated.

It is clear that the present situation
is a major cause of the
conflict between the two communities.
Thus, it is
difficult to understand why
the government has not taken
any steps to improve
the living conditions
of the native population.
However, given the
present political situation,
it is difficult to imagine
any significant changes.
