El "Tio Ernesto"

[illegible][illegible][illegible]

The authors of *Design Thinking* argue that the design process is not just about creating a product, but about creating a solution that meets the needs of the user. They argue that the design process is a series of steps that lead to a solution. The first step is to understand the problem. The second step is to define the problem. The third step is to generate ideas. The fourth step is to prototype. The fifth step is to test. The sixth step is to implement. The authors argue that the design process is a series of steps that lead to a solution.

The following table lists the number of students who took the SAT in each state in 1998. The data are presented in a table with 50 rows (one for each state) and 2 columns (State and Number of Students). The states are listed in alphabetical order.

As the 1980s gave way to the 1990s, the U.S. economy began to show signs of recovery. The unemployment rate fell from 7.6 percent in 1982 to 5.3 percent in 1992. The economy grew at an average rate of 3.2 percent per year. The federal deficit was reduced from \$219 billion in 1982 to \$106 billion in 1992. The U.S. economy was on a path of recovery.
