Consequently, it is not surprising that  
Buddhist monasteries have always had to compete  
for limited resources among non-Buddhist  
monasteries, particularly those associated  
with royal courts and other élite groups.

Ensuite la sécheresse dure longtemps, mais  
l'humidité revient et lorsque le niveau des eaux  
atteint l'altitude de 1 000 mètres, l'aval de la rivière  
est envahi par les eaux qui dévalent la montagne.  
C'est alors que l'aval devient un lac.

The results were generally consistent across the four experiments. In general, the proportion of subjects who reported being uncomfortable was higher than the proportion who reported being uncomfortable in the first experiment.

Government publications and the press as alternative sources contain extensive information on issues. It has been found that the major sources of news are television, broadcast and telephone, and books are also being used more frequently.

Women health professionals make up less than 10% of the medical school population. Women in science, technology, engineering and mathematics (STEM) fields are also underrepresented.

The first section of this article concerns  
the longer episode (1900-1905) of the  
colonial administration by the viceroy. In general  
this was largely an administrative and organisational  
period, with much of the business being  
concerned with the new districts. There  
was however a more active period between 1903 and  
1905, the so-called 'golden years' of colonial  
rule. The second section covers the  
years from 1905 to 1919. From the former to the  
latter, the approach to the situation was also  
changed, and these 'golden' five years reflect the  
increasingly conservative administrative policies

Another year of severe霜害  
and the condition was then  
described as follows. The foliage  
was almost all gone. The ground  
was covered with fallen leaves.

See *Thomomys*, *perotensis*, p. 11. The name *Peromyscus* is derived from the Greek words *pero* (mouse) and *mys* (ear).
