### Macroeconomía en la Economía Global

Edited for the first time in 1994 and translated into ten languages, this work has become the basic text of the schools of economics of the entire Ibero-American and in a classic of macroeconomics at a global level.

This second edition incorporates the new developments theoretical and empirical of the last decade, as well as important cases of world economy of recent years. The Asian crisis, the case of Intel, the debate over the minimum wage, the fall of Argentina, the banking crises, the adoption of the Euro and tax evasion in the world, are some of the topics of full actuality treated in this book.

A difference of the texts of study that until now existed, this is based on principle to end in a model of open economy, emphasizing the interdependence of countries, constituting this point an element of innovation pedagogical.

Felipe Larraín has performed as economic advisor of numerous governments in Latin America, and currently is member of the board of various institutions and companies in Latin America, United States and Europe.

Jeffrey D. Sachs is official advisor of the UN for the Millennium Development Goals. He has advised to various governments of Latin America, Eastern Europe and the former Soviet Union, Africa and Asia.
