

In Orden que Sabe Decir...

La nostra città aveva un solo mercantile di un
tavolo da legno. A destra si trovava un portineria
con due camere che erano già state prese.
Tutte le camere, tranne una che era stata lasciata
per la partita del nostro amico, erano state
occupate da persone di tutte le nazionalità. La nostra
città era una vera e propria città di quattrocento
mila abitanti, ma soltanto dieci mila persone vivevano
in questa città, mentre gli altri erano tutti
ospiti. La nostra città era una vera e propria
metropoli di quattrocento mila abitanti.

"I think he was right as far as the author and publisher
are concerned. He seems to have had a very good idea
and we had a good distributor. However, there are others
who do not think so. Frank told me "Brooks Atkinson" of the
"Book of the Month Club" who said, "The book is probably better than
the play."

Playboy, Oct 1969, p. 102. The author is the
late Dr. Frank W. Billings, formerly of the University,
and was a member of the faculty during the time of the
first class of the first year students at the "new" Uni-
versity and the author's immediate predecessor as
professor of French literature. He was born in Canada in
1891 and educated at Princeton and Harvard, and
spent his life teaching French literature at the
University of Alberta.

Chloris seems to be a difficult name, as there is no
agreement in what it may represent; the old writers and
early botanists have had a different view, based on the
similarity of the leaf-blades.

'Yukon's development can wait till the spring of 1899, when a regular winter trail will be made, and the prospect of making regular winter trips to the Yukon River, to the north, on the Chilkoot, the White Pass, the Yukon River, or the Klondyke, will be opened up to us.'
