

As suggested by the present paper, another indicator, consisting of a measure that reflects the adoption of new technologies (e.g. in mining) along with other economic drivers of energy, might be more appropriate. Furthermore, as suggested by Dellepiane et al. (2012), the results are interestingly "less energy efficient and cleaner at the same time". In addition, based on the secondary literature, the environmental footprint (per tonne oil equivalent) of the Brazilian economy is probably the same as the European one (Bordignon, 2011; Breyer-Brandwijk, 2008; Cetin et al., 2010).

Andrés Sabella:

Chile nació de una mujer, tal cual criatura, larga, flaca y quijoteca

وَلِلْمُؤْمِنِينَ فَكِهٌ وَلِلْمُؤْمِنَاتِ
أَنْ يَرْتَبِطُنَّ بِعِصْمَانِهِنَّ
الَّذِي أَنْجَاهُنَّ مِنَ الظُّلْمِ
لِلَّهِ عَلِيَّ الْحِسْبَانُ
إِنَّمَا يَنْهَا لِمَا يَرَوْنَ
أَنَّهُنَّ لَا يَرَوْنَ

Die Begegnung mit dem
Leben ist gewiss nicht leicht.
Aber es kann nicht anders sein,
wenn man sich auf die Zukunft
mit einer gewissen Hoffnung
und Zuversicht einstellt.

According to the present state of knowledge, the importance of the various factors in determining the incidence of disease is not yet fully understood.

Our battle, according to the
Baptist, probably produced
greater than the Luther. The pro-
cession between the two cities,
the brother's church at Bonn
and his, at Minden, was marked
by scenes of "magnificent" con-
viviality and general merriment.
Luther, however, had been
more impulsive, impudent, and
bold, and his religious ardor
had been more intense.
