

The anthropological perspective on educational assessment

David G. White

University of Cambridge, UK

The anthropological perspective on education provides a different way of thinking about education. Anthropology offers a way of thinking about education that is different from the way in which education is usually thought of. This paper explores the anthropological perspective on education and its implications for educational assessment. It begins by discussing the anthropological perspective on education and then moves on to discuss the implications of this perspective for educational assessment. The paper argues that the anthropological perspective on education offers a way of thinking about education that is different from the way in which education is usually thought of. This perspective offers a way of thinking about education that is different from the way in which education is usually thought of. This perspective offers a way of thinking about education that is different from the way in which education is usually thought of.

Education is a complex phenomenon that has been the subject of much research and debate. One of the most important questions in education is how to assess learning. This paper explores the anthropological perspective on education and its implications for educational assessment. It begins by discussing the anthropological perspective on education and then moves on to discuss the implications of this perspective for educational assessment. The paper argues that the anthropological perspective on education offers a way of thinking about education that is different from the way in which education is usually thought of.
