

Abstract

[illegible]

It is a common mistake to think that the only way to get a good education is to go to a good school. In fact, the quality of the education you receive depends on many factors, including the quality of the teachers, the quality of the curriculum, and the quality of the facilities. A good school is one that provides a high-quality education in a safe and supportive environment. A good teacher is one who is passionate about their subject and who is committed to helping their students learn. A good curriculum is one that is challenging and relevant to the world we live in. And good facilities are those that provide a comfortable and safe learning environment for all students.

[illegible]

1970, 1971). It is important to recognize, however, that the use of the term "cognitive" is not intended to imply that the processes involved are purely mental or that they are not influenced by physical factors. The term is used to emphasize the role of the mind in the process of learning.
