PRINCIPAL PRINCIPLES

The first principle is that the universe is a system of laws. These laws are not arbitrary, but are based on a rational order. The second principle is that the universe is a system of causes and effects. These causes and effects are not arbitrary, but are based on a rational order. The third principle is that the universe is a system of ends. These ends are not arbitrary, but are based on a rational order. The fourth principle is that the universe is a system of means. These means are not arbitrary, but are based on a rational order. The fifth principle is that the universe is a system of values. These values are not arbitrary, but are based on a rational order. The sixth principle is that the universe is a system of goods. These goods are not arbitrary, but are based on a rational order. The seventh principle is that the universe is a system of evils. These evils are not arbitrary, but are based on a rational order. The eighth principle is that the universe is a system of virtues. These virtues are not arbitrary, but are based on a rational order. The ninth principle is that the universe is a system of vices. These vices are not arbitrary, but are based on a rational order. The tenth principle is that the universe is a system of wisdom. This wisdom is not arbitrary, but is based on a rational order.
