

Construction workers strike the great power line — El Paso

Construction workers in the El Paso area have struck the great power line, which runs from the Gulf of Mexico to the Pacific Ocean. The strike is the first in the history of the power line, which was built by the Federal Power Commission in 1934. The workers are demanding better wages and working conditions. The strike has caused a major disruption in the power supply to the El Paso area. The power line is one of the most important in the country, and its interruption has caused a major crisis in the region. The workers are demanding better wages and working conditions. The strike has caused a major disruption in the power supply to the El Paso area. The power line is one of the most important in the country, and its interruption has caused a major crisis in the region.
