

Keep the presentation brief
and don't forget to smile!

The following table shows the results of the regression analysis for the dependent variable "Number of children in the household" (N = 1,000). The table includes the coefficient estimates, standard errors, and t-statistics for each independent variable. The overall F-statistic is 12.34, and the adjusted R-squared is 0.15.

Independent Variable	Coefficient	Standard Error	t-statistic
Intercept	2.50	0.10	25.00
Age	0.05	0.01	5.00
Gender	0.10	0.05	2.00
Income	0.02	0.01	2.00
Education	0.01	0.01	1.00
Married	0.50	0.10	5.00
Children	0.10	0.01	10.00
Constant	1.00	0.10	10.00

The following table shows the results of the regression analysis for the dependent variable "Number of children in the household" (N = 1,000). The independent variables are "Age of the head of household" and "Gender of the head of household". The table includes the coefficient estimates, standard errors, t-statistics, and p-values for each variable.
