Keywords: *workplace spirituality, organizational commitment, organizational citizenship behavior, turnover intention, organizational trust, organizational identification*

These findings are consistent with the idea that the brain's ability to process information is not a simple, linear process. Instead, it is a complex, dynamic system that can adapt to different tasks and environments. This suggests that the brain's ability to process information is not a fixed, innate ability, but rather a skill that can be developed and improved through practice and experience.
