

Abstract This article describes the evolution of the French management field from 1945 to the 1970s. It is divided into three periods: 1945–1955, 1955–1965, and 1965–1975.

The organizational research field is composed of different research fields or specialties. In the 1940s, research is dominated by quantitative research, which is the only field that is recognized by the French scientific community. Later, other fields such as social psychology, sociology, and philosophy of science are recognized. The 1950s and 1960s are characterized by the dominance of the quantitative field, which is the only field that is recognized by the French scientific community. The 1970s are characterized by the dominance of the qualitative field, which is the only field that is recognized by the French scientific community.

Since the 1970s, the French management field has been characterized by a strong emphasis on qualitative research. This is due to the fact that the French scientific community has been increasingly influenced by the American scientific community, which has a strong emphasis on qualitative research. The French scientific community has also been influenced by the European scientific community, which has a strong emphasis on qualitative research. The French scientific community has also been influenced by the French scientific community, which has a strong emphasis on qualitative research.

In the 1970s, the French management field was characterized by a strong emphasis on qualitative research. This is due to the fact that the French scientific community has been increasingly influenced by the American scientific community, which has a strong emphasis on qualitative research. The French scientific community has also been influenced by the European scientific community, which has a strong emphasis on qualitative research. The French scientific community has also been influenced by the French scientific community, which has a strong emphasis on qualitative research.

Management research is a field of study that has been increasingly influenced by the American scientific community. This is due to the fact that the French scientific community has been increasingly influenced by the American scientific community, which has a strong emphasis on qualitative research. The French scientific community has also been influenced by the European scientific community, which has a strong emphasis on qualitative research. The French scientific community has also been influenced by the French scientific community, which has a strong emphasis on qualitative research.
