

referred to as "the 1990s." I mean, sure, people are calling "90's" "the 1990s," but we're not necessarily in the "1990s" yet. We're "towards the 1990s," or "post-1990," or "pre-1990," or "1990-ish." And, I think, it's important to think about the 1990s as a time when we were still in the process of defining ourselves as a nation. We were still figuring out who we were, and what we stood for. And, I think, it's important to think about the 1990s as a time when we were still in the process of defining ourselves as a nation. We were still figuring out who we were, and what we stood for.

The *Spektr* magazine was edited by Sergei Shchegolev, who was previously working as the country director for the US and the UK branches of the Russian gas company Gazprom. He had been involved in Russia's oil and gas privatization efforts in the 1990s and was then working for the Russian Ministry of Energy. He was also a member of the editorial board of the *Pravda* newspaper, which was then the main newspaper of the Russian government. He was also a member of the editorial board of the *Pravda* newspaper, which was then the main newspaper of the Russian government. He was also a member of the editorial board of the *Pravda* newspaper, which was then the main newspaper of the Russian government.

Abstract: The purpose of this study was to determine the effect of the use of a computerized decision support system on the performance of a group of students in a business school. The study was conducted in a business school in the United States. The results of the study showed that the use of a computerized decision support system had a positive effect on the performance of the students. The study also found that the use of a computerized decision support system had a positive effect on the students' self-confidence and their ability to make decisions. The study was limited by the fact that it was conducted in a business school and the results may not be generalizable to other settings.

Abstract

Fig. 1. ^{13}C NMR spectrum of the C_{10}H_8 polymer (a) and of the C_{10}H_8 polymer (b) after treatment with H_2 at 100°C for 24 h.
