Se aplicó a una muestra de 1.000 estudiantes de la Universidad de Chile, entre los meses de mayo y junio de 1997. La muestra fue seleccionada por medio de un muestreo aleatorio simple, estratificado por sexo y facultad. El nivel de confianza es del 95% y el margen de error es del 3%.

Scholarship: The awarding of money or other benefits to students to encourage them to pursue higher education.

For the first time, the authors have shown that the use of a single, simple, and easily administered questionnaire can be used to identify the prevalence of a wide range of mental health problems in a community sample. The authors also found that the prevalence of mental health problems was higher in the community sample than in the clinical sample, which is consistent with the findings of other studies. The authors also found that the prevalence of mental health problems was higher in the community sample than in the clinical sample, which is consistent with the findings of other studies.

1. The first group of authors (e.g., [1, 2]) considers the problem of the control of the motion of a mechanical system with a variable structure. The control is assumed to be piecewise constant, and the system is assumed to be linear. The control is determined by the method of the minimum principle. The control is determined by the method of the minimum principle. The control is determined by the method of the minimum principle.

These findings are consistent with the view that the brain is a complex system, and that the effects of drugs on the brain are not simply additive. The results also suggest that the effects of drugs on the brain are not simply additive, and that the effects of drugs on the brain are not simply additive.
