There were important similarities among various nations registered in League with democratic forms of government, and especially in those nations in which the population was the most homogeneous and the social and political institutions were most democratic. The League was especially active in the United States, where it was the most active and successful.

La tercera importante es la alta calidad, lograda al no tenerse que producir grandes volúmenes de carga, como en el caso de los grandes almacenes.

Phosphorus was added to the water as a nutrient for the algae. The amount of phosphorus added was 10 mg/L. The water was then filtered through a 0.45 µm filter to remove the algae. The filtered water was then used for the experiment.
